

BENEFITS

- ✓ UP-TO-DATE INVENTORY OF IT ASSETS
- ✓ ENRICHED ASSET INFORMATION
- ✓ COMPREHENSIVE ASSET CHANGE LOG INFORMATION

The metadata-driven Asset Module is engineered to maintain asset inventories and allows for the capturing and adding of manual information, as well as continuous geographical location management.

Additionally, thanks to the mobile app, the process of asset-onboarding and-tracking has been made easier. This is because the app allows users to take photos, scan barcodes and more.

FEATURES

Metadata-driven.

Easily add fields / information to be maintained manually.

Maintain Status - "Active", "Spare", etc.

Geographical location tracking

Comprehensive timeline-based asset inventory logs
