

FEATURES

- Fault, performance and availability monitoring with root cause alarm management
- Hop-by-hop analysis along critical paths
- Cross-stack network data correlation
- Customisable topology and dependancy-aware intelligent alerts
- Automated capacity forecasting, alerting and reporting
- Comprehensive monitoring of all tier (FS, Cisco) family of products
- Wireless network monitoring and management
- Single-pane-of-glass network monitoring
- Dynamic statistical network performance baselines
- Hardware health monitoring
- Customisable performance and availability graphs and reports
- Location-base asset grouping
- Banding-based statistics per performance element (i.e., utilisation on interfaces, CPU or memory)
- Third-party alarm- and event-integration to enhance escalations

BENEFITS

- ✓ SCORECARD
- ✓ BULLETIN
- ✓ MONITORED ELEMENT CORRELATION FOR AUDITING AND CENTRAL REPORTING

DEPLOYMENT OPTIONS

- Sintrex Core NG deployment as a standalone or cloud
- Can be consumed from the cloud
- Physical installation on Dell or Supermicro supported
- Virtual installation on VMware only

MARKET SOLUTION

- Fault, Configuration and Performance management
- Continuous risk monitoring and mitigation
- Rapid root-cause identification

REPORTING

- Daily, weekly and monthly reports
- Correlation, capacity and volume reporting

CUSTOMER REQUIREMENT

IT services and operational management through continuous monitoring

Business services management

IT governance and risk management

Financial and asset management
